ABOUT US

Goldline has been designing stove top solutions to household problems since 1990.

Our proud innovation heritage is based on a pioneering spirit & a desire for change, and presents a challenge to conventional appliances.

We provide only the best gas cooktops and high power wok burners that combine beauty and functionality. Thoughtfully crafted in design & layout, our models ensure a luxury cooking experience.

Boasting high powered burners for the most intense heat & flavour and state of the art safety features you can be sure a Goldline cooktop will reward you in terms of innovation & quality. Some Goldline cooktops are designed specially for small and narrow spaces featuring innovative features for chefs, including our specially crafted design layout, to ensure that no burners are excluded from use when cooking with large woks or pots.

INTRODUCTION

BY REAL COOKS, FOR REAL COOKS

Goldline's selection of glass cooktops are Australian Gas Association Approved and come with innovative features, such as:

Option of natural gas or LPG

Available with cast iron trivets

Flame Failure Device, our safety feature

Choice of black or white glass

Solid brass burner rings and bases

Bevelled edge glass

AN AUSTRALIAN COMPANY YOU CAN TRUST

Goldline allows for a personal touch not only in customer service and experience but in our unique ability to offer tailored solutions, from narrow bench tops for small spaces, to tailored stove tops with extra space and heating functionality, Goldline has you covered.

QUALITY YOU CAN RELY ON

With thoughtful burner placement and precision power control, you can be sure that Goldline will be your best friend in the kitchen.

COMPANY HISTORY

How it all started

I received my discharge from the R.A.N. after nine years of service. It was at this time, around the mid 70's that I began my first company. I first began as a registered builder, catering predominately to the Asian community here in Australia.

My clients were always saying to me that the cooktops on the market here were not powerful enough and the layout wasn't right to obtain optimum usage out of all the burners.

I knew there was a business opportunity ready to be explored. I grew up in a family of ten where I remember watching my mother juggling pots and pans on her 4 burner upright cooker and thinking that there must be a better way.

Understanding that there was a gap in the market for good, functional cooktops and remembering how much my mother struggled with her cooker, I was motivated to do something about it.

“In 1991 I launched the very first three-burner cooktop with two wok burners into the market.”

In 1991 I launched the very first three-burner cooktop with two wok burners onto the market.

Sales were quite slow in the beginning. It was in 1992 when the marketing manager of a large corporation in Hong Kong saw my cooker on display during a visit to Australia. I sent a sample of the cooker overseas to company and within a few years, sales had jumped to \$4 million a year.

Our business grew and in 1996 we were a finalist in two sections of the Telstra business awards followed by the Premier's business awards. To add to our recognition was the HSBC Business awards and the Australian Chamber of Commerce awards, Pursuit of excellence of the Victorian Government and the Hong Kong Australia Business Association awards.

Our exports continued to grow and we were exporting to Taiwan, Thailand, Mauritius, Singapore, and Malaysia. The product range has expanded from that first model to more than 14 different models, always maintaining that criteria I observed years ago as a young man watching my mother and listening to my clients.

Today we are proud of the fact that we are still an Australian owned and operated business, finding success in a very competitive marketplace.

Managing Director

SAB4 COOKTOPS

The small space solution for real home chefs

Available in 90cm with 8mm glass

x2 dual control SABAF wok burners

Simmer and boiler burners

European designed high-powered burners

Flame Failure Device for standard safety

Precision multi-flame electronic ignition

Available in natural gas or LPG

Detachable wok ring

Offering flexibility, our SAB4 Cooktop provides advanced heat control features such as a high power Wok burner, style, and durability. Ideal for people who have larger meals, enjoy entertaining, and complex recipes.

ADVANCED FEATURES

Our 4 burner gas stoves come with a range of features that provide you with more power and better control for your cooking requirements. The electronic ignition feature will ignite the cooktop effortlessly.

The flame failure device (FFD) is an standard safety feature that stops the flow of gas as soon as the flame extinguishes. This safety feature will help to protect property from accidental fire damages. The high-powered wok burners of the cooktop provide a powerful cooking experience, ensuring a quick and even cook.

GREAT QUALITY & SERVICE

All our four burner gas stoves are made from the finest quality glass and stainless steel. With rigorous quality standards, our products are accredited to ISO 9001:2015.
