Our Story

Goldline was born from a deep love of family and a dream to elevate the kitchen, a place that warms and unites a home.

In the early 1990s, our founder, Wayne A'Vard, set out to create a cooktop that would make life easier for big families. The inspiration came from cherished memories of his mother cooking for ten — moments of hard work, yet still full of warmth.

Determined to honour that spirit, Wayne invented a cooktop that broke the mould: powerful enough for authentic **wok cooking**, yet slim and versatile enough to fit even the most challenging kitchen layouts. This breakthrough not only transformed the way Australian families could cook at home, but also became the foundation for Goldline's enduring commitment to **innovation, practicality, and heart-led design.**

Proudly Australian

For over three decades, Goldline has remained Australian owned & operated, creating appliances that reflect the way Australians cook and live.

By combining trusted components from around the world with local insight and craftsmanship, we deliver products built to last. Every detail is considered. Every feature is purposeful. So you can trust your kitchen to work beautifully, day after day.

“Luxury quality without the luxury price. That’s the Goldline promise.”

Driven by Care

We imagine every home with a kitchen people truly love — a place where meals become memories, and the everyday feels special.

Through inventing thoughtful designs, we create spaces where cooking is joyful, gatherings are effortless, and *families feel more connected.*

Our purpose is simple: to make life in the kitchen easier, warmer, and more meaningful for every home we touch.

More than that, *our commitment continues long after your Goldline becomes part of your home.* Whether it's maintenance, repairs, or upgrades years down the track, we'll be there. Because at Goldline, our care lasts as long as our products.
